Re: Important Safety Recall for Certain Staccato Ammunition

Dear Dealer:

At Staccato Ammunition (“SA”) our goal is to provide the best ammunition to our customers. Recently, certain ammunition has not performed according to our expectations. Specifically, certain ammunition experienced misfires (failure to fire in response to a proper firing pin strike) for reasons unrelated to the firearms in which it was being used. SA conducted an investigation into this issue and has determined that certain 9mm Range, Match, and Reman ammunition manufactured during the period from October 2025 through January 2026 was made using hardened primer cups. Certain of these primers may fail to ignite even with a proper firing pin strike.

SA’s Range, Match, and Reman ammunition is made for purposes of target shooting. There is a potential for death or serious personal injury, however, if ammunition fails to fire when a firearm is being used for purposes of self-defense. Because SA fully stands behind its ammunition, it is voluntarily initiating a recall of all affected ammunition. This recall solely applies to ammunition in lot numbers 000697 through 001078.

Our sales records indicate that you purchased or received SA 9mm Range, Match, and/or Reman ammunition that may be covered by this recall. If you have any remaining ammunition in inventory, please do not sell it and contact us to determine whether such ammunition is affected by this recall and, if so, to have it replaced with new ammunition free of charge using the following steps:

Step 1 – Please fill out the recall form at the following link: <https://staccato2011.jotform.com/261115449799065>. You will need to provide the lot number listed on the side of the ammunition packaging (see photos below) and the number of cases/boxes you have remaining in inventory.

Step 2 – After confirming that your ammunition is subject to this recall, we will send you a prepaid shipping label with instructions so that you can return it to us, free of charge.

Step 3 – We will ship new replacement ammunition to you free of charge within ten days after receiving the ammunition you are returning.

We also request your assistance in identifying any customers to which you may have sold affected ammunition so that we can contact them directly to notify them of this recall. Please review your sales records and send us a list of the customers to whom you sold the affected ammunition, including their contact information (name, address, telephone number, and/or email address), and the date(a), type(s), and quantities of ammunition they purchased. To the extent

you do not have records of the customers to whom affected ammunition was sold, we would appreciate if you would post a notice regarding this recall in your store and/or on your website.

We apologize for any inconvenience that this may cause. We greatly appreciate your loyalty to SA and continued partnership.

Sincerely,
Team Staccato Ammo
